WORK EXPERIENCE

Unit 221B

Jul. 2022 – Sep. 2024

eWitness Developer (Summer Intern)

Remote

Unit 221B is a cybersecurity company offering discreet, best-in-class cybersecurity assessments, incident response, threat intelligence, investigations, and training.

- Provided second-tier support for Windows and macOS systems, including troubleshooting OS-level issues, application failures, and hardware conflicts.
- Supported Microsoft Office, Exchange, Outlook, and mobile email configurations; ensured system compliance with company security policies.
- Assisted in configuring and maintaining workstations, applying patches and updates via secure workflows; collaborated on documentation for internal support procedures.
- Supported AV equipment setup for remote demos and virtual collaboration tools; ensured system uptime and resolution of connectivity issues.
- Maintained hardware and software inventory and assisted in system decommissioning and warranty support coordination.

Master•Care

Sep. 2025 – Present

IT Technician

Sacramento, CA

Master•Care is a non-medical healthcare company that specializes in patient-centered care and directing patients to make the most out of their medical insurance.

- Designed, installed, and managed a mesh network of wireless access points in a physical office space allowing for wireless gigabit connectivity.
- Single-handedly managed all technical documentation, user permissions, expectations of technological use, digital onboarding, device assignment and reclamation, and access to 10 user portals.
- Gave direct technical support for Windows devices to over 100 employees, including instruction on use of proprietary software.
- Facilitated company-wide cybersecurity audits and penetration testing for existing infrastructure, including simulated phishing attacks.
- Created policies to be followed in the event of data breach or compromise of employee and device; ensured robustness and efficacy of said policies via 3rd party audits.
