WORK EXPERIENCE

Unit 221B

Jul. 2022 – Sep. 2024

eWitness Developer (Summer Intern)

Remote

Unit 221B is a cybersecurity company offering discreet, best-in-class cybersecurity assessments, incident response, threat intelligence, investigations, and training.

- Contributed to the maintenance and enhancement of data collection methods, focusing on back-end development using Python.
- Integrated various APIs for platforms such as Discord and Telegram to streamline data collection processes.
- Utilized Docker to run and modify local stacks, ensuring efficient testing and implementation of solutions.
- Managed tasks and project assignments through a JIRA ticket system, contributing to organized and timely project completion.

Capstone Jigsaw Puzzle Simulator

Sep. 2024 – Jun. 2025

Project Manager, Hardware Team

San Luis Obispo, CA

Cal Poly SLO's Capstone program assigns real-world projects to students, allowing them to work with advisors and clients, culminating in a required project alongside their Senior Project.

- Led a team of students in the design and creation of a specialized computer using Raspberry Pi 5B+ to develop a Jigsaw Puzzle game for residents of a local retirement home.
- Managed communication with advisors and clients, providing updates and incorporating feedback into design iterations, while delegating tasks based on team skillsets.
- Oversaw the technical development and integration of system peripherals, scripting boot sequences, and ensuring functional communication between components.
- Successfully delivered three fully operational devices, complete with documentation for future replication, enhancing residents' ability to engage with puzzles despite physical limitations.
- Resolved complex technical challenges, such as designing a custom power system to accommodate different voltage requirements and troubleshooting library compatibility issues.

EDUCATION

California Polytechnic University: San Luis Obispo

2025

Bachelor of Science, Computer Engineering

San Luis Obispo, CA

SKILLS

Software Engineering; C; Java; Python; Assembly; Verilog; Database Management; Project Management; Technical Writing; Data Structures; Microcontrollers; Hardware Design; Translation across various knowledge levels; Conflict resolution; Public speaking; Adaptability
