WORK EXPERIENCE

Unit 221B

Jul. 2022 – Sep. 2024

eWitness Developer (Summer Intern)

Remote

Unit 221B is a cybersecurity company offering discreet, best-in-class cybersecurity assessments, incident response, threat intelligence, investigations, and training.

- Supported information security operations by assisting in identifying vulnerabilities, troubleshooting security-related incidents, and applying security controls across endpoints and applications.
- Contributed to the development and documentation of security procedures, supporting compliance with organizational policies and regulatory standards.
- Assisted in security testing activities and incident response efforts, analyzing system behavior and escalating risks to senior team members.
- Participated in maintaining asset inventories and documentation used for audits, risk assessments, and remediation tracking.
- Collaborated with cross-functional teams to support secure system operations, ensuring confidentiality, integrity, and availability of information systems.

Master•Care

Jul. 2025 – Jul. 2026

IT Technician

Sacramento, CA

Master•Care is a non-medical healthcare company that specializes in patient-centered care and directing patients to make the most out of their medical insurance.

- Led implementation and enforcement of organizational cybersecurity practices, including risk identification, vulnerability mitigation, and security policy development for a 100+ user environment.
- Coordinated and supported security audits, penetration testing, and phishing simulations, contributing to continuous improvement of security posture and awareness training.
- Developed and maintained incident response procedures, ensuring timely identification, escalation, and resolution of security events.
- Managed user access controls, device security configurations, and data protection policies to safeguard system integrity and confidentiality.
- Maintained documentation for security processes, risk tracking, and remediation efforts, supporting audit readiness and structured risk management practices.
